RESEARCH INTERESTS

Happiness: The Who, What, Where, When, Why, and How

- The architecture of subjective well-being, including its outcomes (e.g., life satisfaction), mediators/mechanisms (e.g., connectedness), and moderators (e.g., personality)
- Pursuing happiness via positive activities (e.g., writing gratitude letters, engaging in flow activities)
- The downstream consequences of well-being, such as greater physical health and career success
- The role of social connection in facilitating human happiness

Digital Technology and Well-Being

- How do emerging technologies (e.g., smartphones, social media, VR) impact well-being?
- How can we harness technology to improve happiness and health?

The Structure of Strengths: Gratitude, Kindness, and Humility

- Gratitude within dynamic social networks with actors, targets, and witnesses
- How doing kind acts for others impacts physical health (e.g., gene expression, cellular aging)
- Gratitude as a trigger of self-improvement efforts in health, kindness, academics, and work
- Increasing state and trait humility (e.g., via self-affirmation and awe interventions)

Hedonic Adaptation to Positive and Negative Life Events

- Exploring how individual well-being levels adapt to positive events (e.g., getting married) and negative events (e.g., being diagnosed with cancer)
- Obstacles to sustainable happiness and thwarting hedonic adaptation to positive events

PUBLICATIONS

*Indicates undergraduate student co-author
