RESEARCH INTERESTS

Happiness: The Who, What, Where, When, Why, and How

- The architecture of subjective well-being, including its outcomes (e.g., positive emotions, life satisfaction), mediators/mechanisms (e.g., connectedness, elevation), moderators (e.g., personality, culture), and downstream consequences (e.g., physical health, career success)
- Pursuing happiness via positive activities (e.g., writing gratitude letters, counting blessings, doing acts of kindness, engaging in flow activities)

Digital Technology and Well-Being

- How smartphones and social media impact psychosocial well-being (e.g., depression, loneliness)
- Are some smartphone apps (e.g., Mail, Facebook, Tinder) associated with more (or less) happiness?

Marriage and Close Relationships

- How close relationships processes (i.e., with friends, family, and spouses) influence well-being
- Longitudinal associations between life satisfaction, depression, and marital quality/satisfaction
- Examining the quality of adult friendship networks, as well as downstream outcomes of friendship
- Comparing the happiness of daters vs. non-daters among single unpartnered people

The Structure of Strengths: Gratitude, Kindness, and Humility

- Exploring gratitude exchanges within a social context (actors, targets, and witnesses)
- How doing kind acts for others impacts physical health (e.g., gene expression, cellular aging)
- Gratitude as a trigger of self-improvement efforts in health, kindness, academics, and work
- Increasing state and trait humility (e.g., via self-affirmation and awe interventions)

Hedonic Adaptation to Positive and Negative Life Events

- Exploring how individual well-being levels adapt to positive events (e.g., getting married) and negative events (e.g., being diagnosed with cancer), including obstacles to sustainable happiness

PUBLICATIONS

*Indicates undergraduate student co-author
